# Power consumption

SCF4 controller

Typical power consumption looks like in diagram below

Where:

1. Com port is open and controller initialized
2. IR filter switched on and off several times
3. IR light switched off and on two times
4. Regular motor operation. Homing and toggle between few presets

C1 PRO camera

Camera typical power consumption looks like in diagram below

Where:

1. Camera powered on
2. Software requests to open camera
3. Actual data transfer starts
4. Camera preview closed, camera switched off
