

mk1 C920 PCBA wiring

New C920 wiring

Recently updated C920 webcam version was released featuring new PCB. These changes introduced two unexpected issues: wiring is different and new PCB has mechanical interference with aluminium rework kit back plate.

If you rework webcam by yourself, please use pin-out diagram as pictured below to solder wires.

Test point	Signal
TP24	VCC
TP26	USB D+
TP25	USB D-

green soldering mask with scalpel to access GND.
