

# Raspberry Pi and IMX462 CSI-2 camera - How To

Explains how to use IMX462 CSI-2 camera with Raspberry Pi computers

- Prepare SD card
- Raspberry Pi 4 Bookworm
- Raspberry Pi 4 CM Bookworm
- Raspberry Pi 5 Bookworm
- Raspberry Pi 5 CM Bookworm
- Raspberry Pi Zero 2 W

# Prepare SD card

There are other SD card prepare tools but for this article will stick with Raspberry Pi Imager. It will allow you to select Raspberry Pi device, operating system and some settings like wireless AP and SSH for headless installations. This is basics, and if something is not clear official Raspberry Pi instructions should be followed.

# Raspberry Pi 4 Bookworm

## Prepare SD card

- Device: Raspberry Pi 4 (Models B, 400, and compute Modules 4, 4S)
- OS: Raspberry Pi OS (64-bit) (tested with release 2025-05-13)

## Connect CSI2 camera

## OS Prepare

Login to your Raspberry device and update it first.

```
sudo apt update  
sudo apt upgrade -y
```

## IMX462

Camera 462x-CSI-M12x, with 687.0832.10A 15 to 22pin FFC cable.

## Setup camera

Edit config file:

```
sudo nano /boot/firmware/config.txt

# camera_auto_detect=1 --- Find camera_auto_detect=1 and comment it out.

# Paste these lines at the end of the config file
dtoverlay=imx462,clock-frequency=37125000
camera_auto_detect=0
```

Default camera port is cam1

Reboot

## Test camera

Check if camera is detected

```
libcamera-hello --list-cameras

Available cameras

# Raspberry Pi 5 Bookworm

## Prepare SD card

- Device: Raspberry Pi 5 (Raspberry Pi 5, 500, and Compute Module 5)
- OS: Raspberry Pi OS (64-bit) (tested with release 2025-05-13)

## Connect CSI2 camera

## OS Prepare

Login to your Raspberry device and update it first.

```
sudo apt update  
sudo apt upgrade -y
```

# IMX462

Camera 462x-CSI-M12x

## Setup camera

Edit config file:

```
sudo nano /boot/firmware/config.txt
# camera_auto_detect=1 --- Find camera_auto_detect=1 and comment it out.

# Paste these lines at the end of the config file
dtoverlay=imx462,cam0,clock-frequency=37125000
camera_auto_detect=0
```

Note absent cam1 argument in dtoverlay string. If cam1 or cam0 is present Raspberry Pi will not recognize camera.

Reboot

## Test camera

Check if camera is detected

```
libcamera-hello --list-cameras

# Raspberry Pi Zero 2 W

## Prepare SD card

- Device: Raspberry Pi Zero 2 W
- OS: Raspberry Pi OS (64-bit) (tested with release 2025-05-13)

## Connect CSI2 camera

## OS Prepare

Login to your Raspberry device and update it first.

```
sudo apt update  
sudo apt upgrade -y
```

This is important, when tested current OS without updating camera did not work. Will take a while to complete.

## IMX462

Camera 462x-CSI-M12x

# Setup camera

Edit config file:

```
sudo nano /boot/firmware/config.txt
# camera_auto_detect=1 --- Find camera_auto_detect=1 and comment it out.

# Paste these lines at the end of the config file
dtoverlay=imx462,clock-frequency=37125000
camera_auto_detect=0
```

Reboot

## Test camera

Check if camera is detected

```
libcamera-hello --list-cameras

Available cameras
-----
