USB Camera on Android

C1 family cameras are compatible with Android operating system and can be used as external camera without rooting device nor tampering with drivers. If application is coded properly it should let you select external camera somewhere in settings.

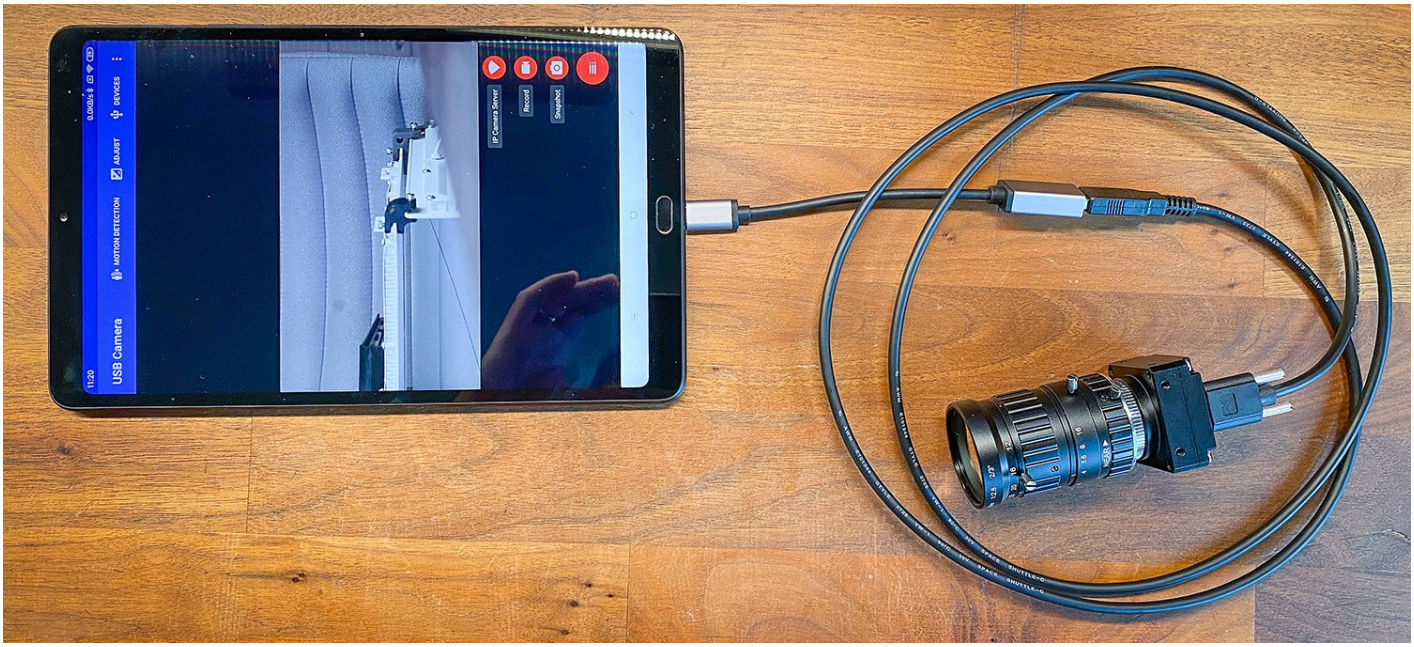

Android application

Free version of USB Camera application can be used to perform basic tasks:

- Take snapshot pictures
- Record video
- Adjust auto/manual parameters

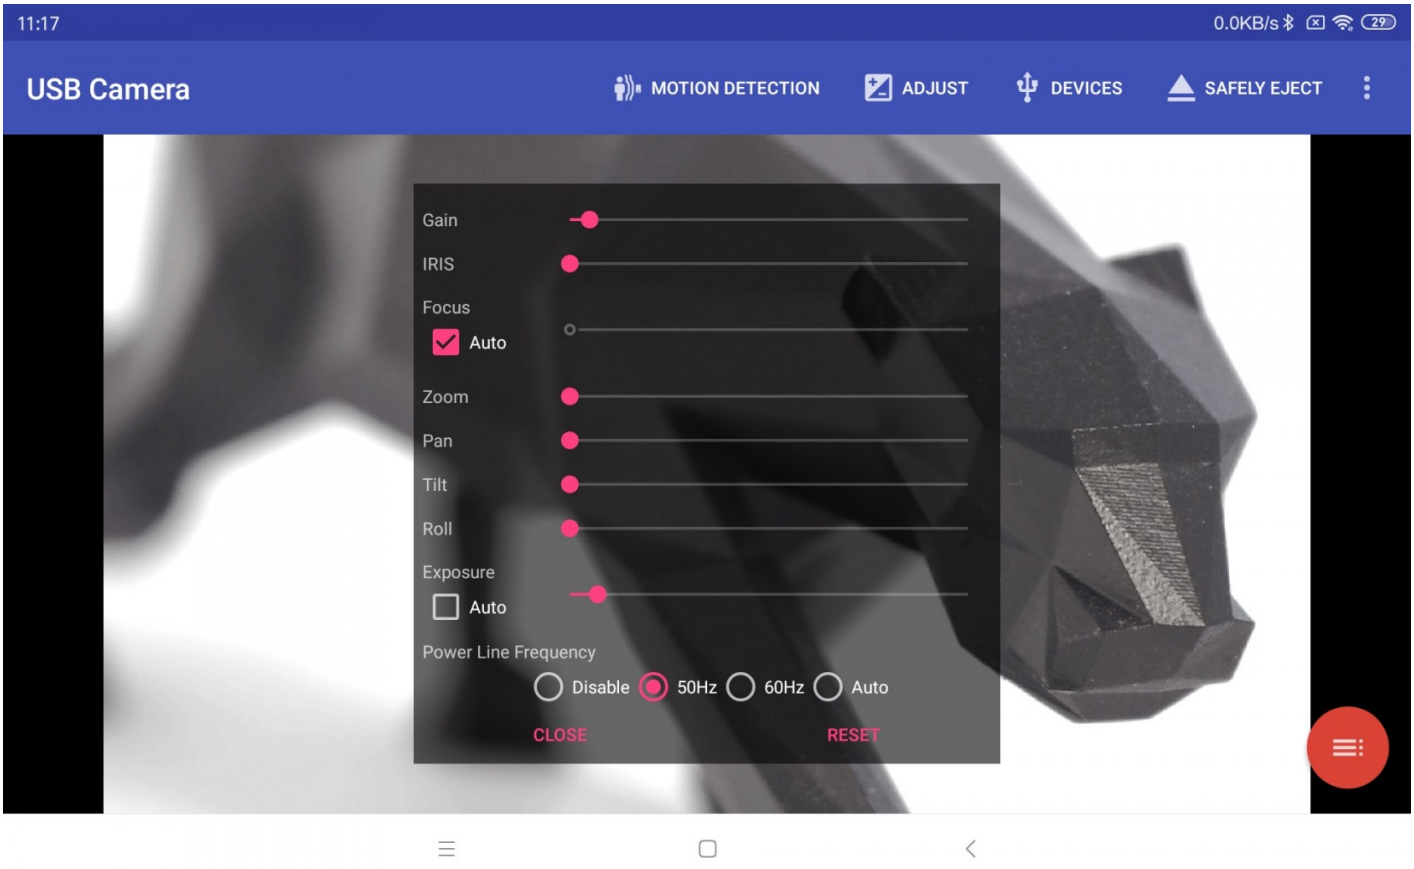

Connectivity

Modern tablets and mobile phones have USB-C port, so USB-C to USB-A OTG cable should be used.

Examples

Manual adjustments window
